BH-MT-ID

Medical grade Introducer dilator

Features/Applications:

BH-MT-ID Medical-grade introducer dilator is a supporting component for introducer sheath kits. Equipped with a tapered gradient tip, it is used together with a guidewire to gently expand the puncture channel and facilitate smooth insertion of the sheath into the human body. It is a single-use sterile accessory for interventional access.

- Medical-grade PE and PP materials
- Support customization of multiple French (Fr) sizes and lengths
- Injection-molded construction with zero leakage risk
- Size-coded hubs for different Fr specifications
- Compliant with ISO 10993 and USP Class VI
- Compatible with ethylene oxide (EO) sterilization
- Color: Colors can be customized

Product Dimensions (mm)

Normal Size	Supplied OD	
	INCH	MM
6 F	0.087	2.20
8 F	0.104	2.65
10 F	0.131	3.33
12 F	0.157	4.00
14 F	0.183	4.65
16 F	0.207	5.25
18 F	0.234	5.95
20 F	0.260	6.60

Other sizes and the length could be customized on request.
