BH-MT-PAS

Medical grade peel-away sheath Introducer

Features/Applications:

BH-MT-PAS Peel-Away sheath introducer serves as working access for interventional procedures. It can be split and peeled off after device implantation to avoid limitations of conventional sheath withdrawal. Featuring stable tearing performance, kink-resistance, low-friction and X-ray visibility, it is widely used for pacemaker lead implantation, central venous access and minimally invasive drainage interventions.

- Medical-grade PTFE and Pebax materials
- Support customization of multiple French (Fr) sizes and lengths
- Injection-molded construction with zero leakage risk
- Color-coded hubs for different Fr specifications
- Compliant with ISO 10993 and USP Class Ⅵ
- Compatible with ethylene oxide (EO) sterilization
- Color: Custom colors are acceptable

Product Dimensions (mm)

Normal Size	Supplied OD	
	INCH	MM
6 F	0.087	2.20
8 F	0.104	2.65
10 F	0.131	3.33
12 F	0.157	4.00
14 F	0.183	4.65
16 F	0.207	5.25
18 F	0.234	5.95
20 F	0.260	6.60

The length could be customized on request.
